ORACLE®

BI Publisher with their Agile and E-Business Suite application.

These three real customers who chose Fusion Middleware to augment their Applications functionality all had a binding theme: they demonstrated that Fusion Middleware could help an application cross over departmental and organizational boundaries to address business issues.

Apollo Group chose Oracle SOA Suite to maximize the amount of financial aid disbursed to their student community. Embry-Riddle addressed the number one problem faced by all universities – tighter security and quicker provisioning – using Oracle Identity Manager. Qualcomm offered a seamless Web 2.0 experience to their customers using Oracle ADF. These customers all had different business issues, but a common strategy – Fusion Middleware with their Applications.

If you are attending COLLABORATE 08: Technology and Applications Forum for the Oracle Community, you will get a chance to meet and hear from some of the 2007

Oracle Excellence Award winners and acquire enough Fusion Middleware ammunition to wage your next business battle. Depending on what business problems you plan to tackle, you can pick and choose how Fusion Middleware can assist. And don't forget to share your success stories with us – you could be the next Oracle Excellence Award winner.

*Many of the winners of the 2007 Oracle Excellence Awards worked with OAUG SI members, including:

- **Innowave Technology** (worked with SecurePath and Syntax-Brilliant)
- **BIAS Corp** (worked with Universal Lighting Technologies)
- **E2E Consulting** (worked with Apollo Group and Tucson Electric Power)
- **Keste LLC** (worked with Qualcomm Inc.) 

Floyd Teter, systems engineer for Institutional Business Systems at the Jet Propulsion Laboratory in Pasadena, Calif., contributed to this article.
